

Table of Contents

Session I: Foundations

A Proof-Theoretic Approach to Hierarchical Math Library

Organization

Kamal Aboul-Hosn, Terese Damhøj Andersen 1

An Exploration in the Space of Mathematical Knowledge

Andrea Kohlhasse, Michael Kohlhasse 17

Session II: Authoring

Authoring Presentation for OPENMATH

Shahid Manzoor, Paul Libbrecht, Carsten Ullrich, Erica Melis 33

Translating Mathematical Vernacular into Knowledge Repositories

Adam Grabowski, Christoph Schwarzweller 49

Assisted Proof Document Authoring

David Aspinall, Christoph Lüth, Burkhard Wolff 65

Session III: Representations

A Tough Nut for Mathematical Knowledge Management

Manfred Kerber, Martin Pollet 81

Textbook Proofs Meet Formal Logic – The Problem of

Underspecification and Granularity

Serge Autexier, Armin Fiedler 96

Processing Textbook-Style Matrices

Alan Sexton, Volker Sorge 111

Session IV: Proving

A Generic Modular Data Structure for Proof Attempts Alternating on Ideas and Granularity

*Serge Autexier, Christoph Benz Müller, Dominik Dietrich,
Andreas Meier, Claus-Peter Wirth* 126

X Table of Contents

Impasse-Driven Reasoning in Proof Planning
 Andreas Meier, Erica Melis 143

Literate Proving: Presenting and Documenting Formal Proofs
 Paul Cairns, Jeremy Gow 159

Session V: MKManagement Tools

Semantic Matching for Mathematical Services
 William Naylor, Julian Padget 174

Mathematical Knowledge Browser with Automatic Hyperlink
Detection
 Koji Nakagawa, Masakazu Suzuki 190

A Database of Glyphs for OCR of Mathematical Documents
 Alan Sexton, Volker Sorge 203

Session VI: Documents

Toward an Object-Oriented Structure for Mathematical Text
 Fairouz Kamareddine, Manuel Maarek, J.B. Wells 217

Explanation in Natural Language of $\bar{\lambda}\mu\tilde{\mu}$ -Terms
 Claudio Sacerdoti Coen 234

Engineering Mathematical Knowledge
 Achim Mahnke, Jan Scheffczyk 250

Session VII: MKM Case Studies

Computational Origami of a Morley's Triangle
 Tetsuo Ida, Hidekazu Takahashi, Mircea Marin 267

Designing Diagrammatic Catalogues of Types of Basic Interval
Equation: A Case Study
 Zenon Kulpa 283

Gröbner Bases — Theory Refinement in the Mizar System
 Christoph Schwarzweller 299

Session VIII: Course Materials

An Interactive Algebra Course with Formalised Proofs and Definitions <i>Andrea Asperti, Herman Geuvers, Iris Loeb, Lionel Elie Mamane, Claudio Sacerdoti-Coen</i>	315
Interactive Learning and Mathematical Calculus <i>Arjeh M. Cohen, Hans Cuypers, Dorina Jibetean, Mark Spanbroek</i>	330

Session IX: Migration

XML-izing Mizar: Making Semantic Processing and Presentation of MML Easy <i>Josef Urban</i>	346
Determining Empirical Characteristics of Mathematical Expression Use <i>Clare M. So, Stephen M. Watt</i>	361
Transformations of MML Database's Elements <i>Robert Milewski</i>	376
Translating a Fragment of Weak Type Theory into Type Theory with Open Terms <i>Gueorgui I. Jojgov</i>	389
Author Index	405
